PHYSICS LETTERS B

Volume 311, number 1,2,3,4 **29 July 1993**

Contents

Nuclei

On the axial charge in Skyrme models with vector mesons
N. Kaiser and U.-G. Meißner 1

Triton calculations with the new Nijmegen potentials
J.L. Friar, G.L. Payne, V.G.J. Stoks and J.J. de Swart 4

The incompressibility of hot asymmetric nuclear matter
I. Bombaci, T.T.S. Kuo and U. Lombardo 9

Charge-symmetry-breaking nucleon–nucleon interaction in the 1s0d-shell nuclei
S. Nakamura, K. Muto and T. Oda 15

Dirac sea effects in K^+ scattering from nuclei
J.C. Caillon and J. Labarsouque 19

Strong isomer production in fragmentation reactions
B.M. Young et al. 22

Particles and Fields

Quantum gravity and the large scale structure of the universe
O. Bertolami, J.M. Mourão and J. Pérez-Mercader 27

Multidimensional gravity and no-boundary condition
G.A. Mena Marugán 34

Do global string loops collapse to form black holes?
J. Fort and T. Vachaspati 41

Canonical analysis of a class of two-dimensional dilaton-gravity models
M. Önder and R.W. Tucker 47

Geometrical action for $w_{\pm\infty}$ algebras
R.P. Manvelyan and R.L. Mkrtchyan 51

Renormalization group approach to matrix models in two-dimensional quantum gravity
C. Ayala 55

Factorization in 2D string theory
H. Shirokura 64

Explicit resolution of an integrable $c(4, 3)$ open string theory
L. Houart 71

$N=8$ superconformal algebra and the superstring
L. Brink, M. Cederwall and C.R. Preitschopf 76

Comment on the background independent open string theory
S.L. Shatashvili 83

Mellin–Barnes representation for the genus-g finite temperature string theory
A.A. Bytsenko, E. Elizalde, S.D. Odintsov and S. Zerbini 87

Operator formulation of q-deformed dual string model
M. Chaichian, J.F. Gomes and P. Kulish 93

Quark spin and the Θ-term for the QCD string
J. Pawełczyk 98

The spectral problem for the q-Knizhnik–Zamolodchikov equation
P.G.O. Freund and A.V. Zabrodin 103

Yukawa couplings involving excited twisted sector states for $\mathbb{Z}_M \times \mathbb{Z}_N$ orbifolds
D. Bailin, A. Love and W.A. Sabra 110

On a solitonic specialisation for the general solutions of some two-dimensional completely integrable systems
D.I. Olive, M.V. Saveliev and J.W.R. Underwood 117

Consistent couplings between fields with a gauge freedom and deformations of the master equation
G. Barnich and M. Henneaux 123

Two-cocycle arising from the Chern–Simons three-form
D. Bak 130

Canonical Chern–Simons theory and the braid group on a Riemann surface
M. Bergeron, D. Eliezer and G. Semenoff 137

(Continued on page 3 of cover)

PHYSICS LETTERS B

Volume 311, number 1,2,3,4 **29 July 1993**

Contents

(Continued from page 4 of cover)

Searching for leptoquarks in electron–photon collisions
O.J.P. Éboli, E.M. Gregores, M.B. Magro, P.G. Mercadante and S.F. Novaes 147

Rare *K*-decays as crucial tests for unified models with gauged baryon number
P.B. Pal 153

Walking technicolor and the $Zb\bar{b}$ vertex
R.S. Chivukula, E. Gates, E.H. Simmons and J. Terning 157

The fermion mass hierarchy and gauged chiral flavour quantum numbers
C.D. Froggatt, G. Lowe and H.B. Nielsen 163

Leptonic Fritzsch matrices and neutrino oscillations
K.S. Babu and Q. Shafi 172

Towards a model independent treatment of future solar neutrino data
S.M. Bilenky and C. Giunti 179

Proton β decay in large magnetic fields
M. Bander and H.R. Rubinstein 187

On the operator content of the sinh-Gordon model
A. Koubek and G. Mussardo 193

Generalised harmonic oscillator systems and their Fock space description
T. Brzeziński, I.L. Egusquiza and A.J. Macfarlane 202

Non-trivial phase structure of ϕ^4-theory at finite temperature
K. Langfeld, L. v. Smekal and H. Reinhardt 207

Chiral thermodynamics in the $1/N$ expansion
H. Meyer-Ortmanns, H.J. Pirner and B.-J. Schaefer 213

Gribov copies in lattice QCD
P. Marenzoni and P. Rossi 219

The confining string and its tension for SU(2) gauge fields in 2+1 dimensions
M. Teper 223

O(a) perturbative improvement for Wilson fermions
S. Naik 230

Bosonization and cluster updating of lattice fermions
U.-J. Wiese 235

Non-perturbative renormalization of two-quark operators with an improved lattice fermion action
G. Martinelli, S. Petrarca, C.T. Sachrajda and A. Vladikas 241

Electroweak corrections to reduction solutions in the standard model
W. Zimmermann 249

Two-photon decay widths of Higgs particles
A. Djouadi, M. Spira and P.M. Zerwas 255

Angular and energy correlations in Higgs decay
A. Skjold and P. Osland 261

Indications for a detonating quark–gluon plasma
N. Bilić, J. Cleymans, E. Suhonen and D.W. von Oertzen 266

A classical model of the gluon bag. Exact solutions of Yang–Mills equations with a singularity on the sphere
F.A. Lunev 273

Baryon and meson density of states
M.G. Mustafa, A. Ansari, J. Dey and M. Dey 277

Improved bag model structure functions
A. Ardekani and A.I. Signal 281

Approximate determination of the gluon density at low-x from the F_2 scaling violations
K. Prytz 286

Once more about Penguin
A.N. Ivanov, N.I. Troitskaya and M. Nagy 291

Probes of heavy meson substructure in e^+e^- annihilation
F.E. Close and G.J. Gounaris 297

Exotic bound state production at hadron colliders
J.H. Kühn and E. Mirkes 301

Study of charmless *B* meson semileptonic decays in an inclusive model
M. Artuso 307

(Continued on preceding page)

Volume 311, number 1,2,3,4 29 July 1993

Contents

(Continued from following page)

On W^+W^- production near threshold
V.S. Fadin, V.A. Khoze and A.D. Martin 311

Diffractive W and Z production at $p\bar{p}$ colliders and the pomeron parton content
P. Bruni and G. Ingelman 317

Single- and double-spin asymmetries in the Drell–Yan process at RHIC
E. Leader and K. Sridhar 324

Evolution modes of the vacuum Wigner function in strong-field QED
I. Białynicki-Birula, E.D. Davis and J. Rafelski 329

High-energy nuclear γ-Cherenkov radiation
D.B. Ion and W. Stocker 339

Photon–photon and bremsstrahlung production of fast antihydrogen in $\bar{p}$–nucleus collisions
G. Baur 343

Updated analysis of high precision LEP data
A. Blondel and C. Verzegnassi 346

Study of invisible nucleon decay, $n \to \nu\nu\bar{\nu}$, and a forbidden nuclear transition in the Kamiokande Detector
Y. Suzuki et al. 357

Antiproton–proton annihilation at rest into $\omega\pi^0\pi^0$
Crystal Barrel Collaboration 362

Radiative protonium annihilation into $\gamma\gamma$, $\gamma\pi^0$, $\gamma\eta$, $\gamma\omega$ and $\gamma\eta'$
Crystal Barrel Collaboration 371

Measurement of Λ_b production and lifetime in Z^0 hadronic decays
DELPHI Collaboration 379

Search for anomalous production of high mass photon pairs in e^+e^- collisions at LEP
OPAL Collaboration 391

Determination of α_s from the scaling violation in the fragmentation functions in e^+e^- annihilation
DELPHI Collaboration 408

First measurement of the B_S meson mass
ALEPH Collaboration 425
